

## The ring scanner configuration and SDK description

### 1 Configure bar code

#### 1.1 Turn on/off the buzzer

#### 1.2 Turn on/off the vibrator

#### 1.3 Bluetooth scanning address pairing (Behind the BT is the bluetooth address)

#### 1.4 HID and SPP switch

Scan head configuration. See the specific scanning head datasheet.

## 2, SDK (Based on v1.0.0.1)

The ring scanner supports two return instructions. You can send the appropriate instructions with PDA terminal through the Bluetooth SPP protocol.

“R1”(Character): Buzzer lasts two seconds

“R3”(Character): Vibrator lasts two seconds
